Page Publishing, Inc., United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.This book presents a complete, comprehensive, mathematical method for making money in stocks. This objective method will show you how to determine a specific low price per share to pay for a specific stock, how to determine a specific high price to sell this stock, how to calculate the amount of capital gains for this stock, and how to find the overall rate of return for the investment. With the unlikely exception of buying a stock at the absolute fifty-two-week low and selling it at the absolute fifty-two-week high, this method provides the optimum overall profit for an investment. The level of mathematics used is simple arithmetic with sample calculations provided as examples. Hollis also explains how to use the information available on the Internet to determine whether or not to buy a specific stock. He also has included the criteria and standards he uses as guidelines in selecting the companies in which he invests.
