

Droplet-Wall and Spray-Wall Interaction at Increased Ambient Pressure and Wall Temperature

By Jochen Stratmann

Shaker Verlag Jul 2009, 2009. Buch. Book Condition: Neu. 21x14.8x cm. Neuware - In direct-injection gasoline engines, the interaction of the fuel spray with a wall of the combustion chamber may influence the mixture formation process and, as a consequence, the engine efficiency and emissions. Detailed knowledge of the fundamental phenomena occurring throughout this process is therefore a prerequisite for the development of such engines. Spray-wall interaction models employed in numerical tools for engine development are based on a limited number of experimental investigations, of which many are conducted with respect to applications other than fuel injection. This work aims at contributing to the clarification of the role of the wall temperature and the ambient gas pressure on the droplet-wall and spray-wall interaction process at gasoline engine-relevant conditions. The results of this study feature a classification of droplet-wall interaction regimes in dependence on the initial droplet Weber-number, the wall temperature as well as the ambient pressure. The properties of the secondary droplets resulting from droplet breakup are characterized as to their size, number, velocity, trajectory and diameter-velocity correlation using Phase-Doppler Anemometry. The secondary droplet diameter distribution is approximated by a suitable distribution function. The parameters of this function are formulated...

Reviews

Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.

-- **Felicia Nikolaus**

These sorts of ebook is the ideal book offered. It can be writter in simple terms rather than confusing. I discovered this pdf from my dad and i advised this publication to understand.
